

The Customer shall install and maintain at the Customer's expense a service (3/4" minimum), which shall begin at the meter and extend to the residence, business, or place of use. The service line shall connect to the District's water meter.

The Customer also agrees to be fully responsible for the service line from the water meter to the home including the installation of an approved back-flow device if required.

The Customer agrees to comply with and be bound by the Articles, Bylaws, Rules and Regulations of the District, now in force, or as hereafter duly and legally supplemented, amended, or changed. The Customer also agrees to pay for water at such rates, time, and place as shall be determined by the District, and agrees to the imposition of such penalties for noncompliance as are now set out in the District's Bylaws and Rules and Regulations, or which may be hereafter adopted and imposed by the District.

The Customer agrees to pay a refundable water meter deposit in the amount of the above deposit fee. In the event service to the Customer is terminated, either voluntarily by the Customer, or by the District, for cause, the deposit shall be held and applied by the District to any unpaid balance then owing on the Customer's account. Should the account be fully paid at the time of termination of service to the Customer, the deposit shall be refunded by the District within a reasonable time thereafter.

The District shall have final authority in any question of location of any service line connection to its water main line; shall determine the allocation of water to the Customer in the event of a water shortage; and may shut off water to a Customer who allows a connection or extension to be made of the Customer's service line for the purpose of supplying water to another user. In the event the total water supply shall be insufficient to meet all of the needs of the Customer, or in the event there is a shortage of water, the District may prorate the water available among various Customers on such basis as is deemed equitable by the Board of Directors, and may also prescribe a schedule of hours covering use of water for garden purposes by particular Customers and require adherence thereto or prohibit the use of water for garden purposes; provided that, if at any time the total water supply shall be insufficient to meet all of the needs of all the Customers, the District must first satisfy all of the needs of all Customers for domestic purposes before supplying any water for livestock and must satisfy all the needs of Customers for both domestic and livestock purposes before supplying any water for garden purposes.

The Customer agrees that no other present or future source of water will be connected to any water lines served by the District's waterlines and will disconnect from the present water supply prior to connecting to and switching to the District's system and shall eliminate their present or future cross-connections in the Customer's system.

The Customer shall connect the service lines to the District's water meter and shall commence to use water from the system on the date the water is made available, to the Customer by the District. Water charges to the Customer shall commence on the date service is made available, regardless of whether the Customer connects to the system.

The District recommends the customer install a **pressure reducer valve on their side** of the water meter to regulate the water pressure inside their home.
